The purpose of the app is to allow you to track, in as little or as much detail as you wish, your period and ovulation cycles. And what's great about this app is that you don't get the feeling that only scientists can operate it.

The simple to use and understand interface hits you from the home page - with today's twitter-like minds it's growing more and more important to be able to read, assess and conclude in very little time and the home screen of this app fits that bill completely. Regular Berry Software, LLC's Algebra Touch Intro – Order of Operations App for iPhone, iPod Touch, and iPad clearly and succinctly explains and tests basic principles of algebra. Educational apps are not necessarily the glamorous, fun gaming and social media apps normally associated with iPhones, iPods, and iPads, but they make learning even the most basic principles modern and approachable.

The Algebra Touch Intro – Order of Operations App for iPhone, iPod Touch, and iPad helps you save some serious face with your kids. The app explains basic algebraic principles to those of us who haven't been in a math class in twenty years—or more. This app addresses addition, terms like and unlike, negatives, multiplication, and order of operations. Algebra Touch Intro has two sections. In one, principles are demonstrated and explained. In the other section, there are practice problems to reinforce each principle. You can move between each section by simply touching an icon at the top of the screen.

Most of these features are exclusive to this program, which makes it one of the most advanced recorder.

This is a great recorder, don't just take our word for it: Audio Memos Free has been featured by Apple in the "What's hot" section.

This is an ad supported version of "Audio Memos". So you get most of the full version's features, with NO LIMITS on recording length as on many other free products.

Your recordings are stored on your device but can be backed up to your computer using a simple web browser (or by email). The download procedure is no more complicated than going on our web site and clicking on download files (no registration required). See our website for more details.

Detailed features:

- Send recordings by email (up to 3MB in free version).
- Use bookmarks to navigate easily in a recording (in the pro version).
- Voice and timer activated recording (in the pro version).
- Send or delete multiple recordings at a time (in the pro version).
- High quality recordings up to 44100 Hz. Three levels of quality are available: 11025 Hz, 22050 Hz and 44100 Hz.
- Professionally engineered audio normalizing filter, which enables you to have a constant average volume on all your recordings. This feature does not modify your recordings, so you can turn it on even if you intend to post process your audio files on a computer.
- Wide range volume control using a volume boost. While listening to a recording, volume can be increased using your device's volume keys. If you find this insufficiently loud, you can adjust the volume boost in the application's settings.
- Normalizing and boosting filters use dynamic compression with a non linear function to prevent clipping and minimize distortions. Note however that eventual clipping and distortion created by the microphone are not suppressed. If you care about quality, use the headset's microphone instead of the built in one.
- Make stereo recordings (in the paid version).
- Records even when your device is in sleep mode; and pauses automatically in the event of an incoming phone call.
- Advanced listing of your recordings, which displays name, date, length and size information. A detailed view is also available for each recording. This view gives extra information such as quality and download status of a recording.
- Must have controls as pause record, pause play, slider, quality control.
- Uses widespread wav format to store recordings, so you can transfer and read them on any device.
- Works with the iPod Touch if you have an Apple headset with a microphone.
- Upload recordings to any FTP server you choose (in the pro version).
- Access your recordings as a remote drive using the Finder, Windows Explorer or any WebDAV client (in the pro version).

The Amazon Web Services (AWS) Console mobile app lets you quickly view your Amazon Elastic Compute Cloud (EC2) instances, Amazon S3 buckets, Amazon Route 53 hosted zones, load balancers (ELB), Amazon Relational Database Service (RDS) instances, Auto Scaling groups, AWS OpsWorks stacks, and Amazon CloudWatch alarms. This app lets you quickly view information on your AWS resources and provides some EC2 management functionality to support incident response from outside the office.

EC2, S3, Route 53, ELB, RDS, Auto Scaling, and AWS OpsWorks customers can use the app to browse resources and view configuration details, metrics, and alarms. EC2 users can perform instance lifecycle operations, manage Elastic IPs and Security Groups, and create snapshots of connected EBS volumes. Service Health Dashboard notifications provide real-time information on service availability, and users with billing permissions can monitor total service charges.

The AWS Console mobile app requires an existing AWS account. Note that if you sign in as an AWS Identity and Access Management (IAM) user, you need to use the account alias that was provided by your administrator. If you use AWS Multi-Factor Authentication (MFA), we recommend using either a hardware MFA device or a virtual MFA on a separate mobile device for the greatest level of account protection.

Review comments from users:

"Great App, seriously one of the best apps ever"

"I have no connection to builders of this app or the company, but if you really want to write a quality book, then stop looking and use this app. Whether you want to write a children's book, or the great American novel, this is the best and easiest "creat-a-book" app in the world, and I've tried them all. It's so easy to use, yet the quality doesn't suffer at all. I always wanted to write a book, this app has allowed one of my dreams to come true. Thank You. A+"

"I'm writing a booklet for all of my friends who are getting married this year, and this app is perfect for my little project! I love how easy it is to use, and how intuitive the app is to all the layers I am putting on the pages! I can't wait to see the finished product in a hard copy!"

"I love this app. I have been writing a 400 page book and was glad to see that this is helpful, efficient, and easy to use. I recommend this for all. You can write picture, story, scrapbook and so much more. "

"Easy to create my travel book while I'm on the road."

Chronology – Timer – Productivity

By Treeness, LLC

<http://treeness.com/apps/chronology/>

<https://itunes.apple.com/en/app/chronology-timer/id290919131?mt=8>

Chronology lets you run and view multiple timers simultaneously.

You can create up to 20 separate timers that can be started, paused, and reset individually or as a group. Timers can count upwards indefinitely or count downwards from a specified time. Once a timer reaches that specified time, it continues counting down so that you know how much time has passed since the countdown finished.

Each timer can play an alert sound at the end of a countdown that can play up to 30 times. Chronology supports Background Alerts so your alarms will ring in the background. (If you don't hear any sound, check to see that the mute switch isn't enabled.)

Chronology offers advanced features like saved timer sets, reports, looping timers, and timer confirmation to prevent you from accidentally stopping or starting timers.

Chronology is designed to be streamlined and hassle-free even when providing those advanced features. It's fast and easy to use.

Learn Danish – Education

By Greg Vick

<http://elanguageapps.appspot.com/>

<https://itunes.apple.com/us/app/learn-danish/id517268799?mt=8>

Forget learning how to ask directions to the nearest municipal swimming pool!! We're here to help you learn all the most common used Danish words in ONE week.

As kids we were memorizing hundreds of words without effort. It worked due to strong associative memory and connection between words and sensation.

We believe that a language is an audio-visual dynamic environment of images.

We design this app with help of a linguist to help beginners make their learning more efficient and more effective.

Notable features:

- * Flash cards associated with audio in BOTH Danish and English by native speakers.

(To memorize foreign words relying not on translation, but on object.)

- * Addicting game to improve learners' memory

- * High quality native speaker audio recordings

- * 1000 Most Frequently Used Words to learn

- * 20 Danish Topics including:

Danish Course - Travel

Danish Course - Places

Danish Course - Directions

Danish Course - Money and Shopping

Danish Course - Eating and Dining

Danish Course - Colors and Numbers

Danish Course - Family and Friends

*** How does this app work? ***

Learn section: You will learn the name and pronunciation of a word as you slide across the screen. Every word is pronounced in both Danish and English.

Quiz section: You will hear a name belonging to one of images show on the screen. You should tap an image to complete the quiz, the pleasant applause tells a correct answer.

Every section is designed so you can enjoy success time after time and receive positive reinforcement from the likable teacher.

*** What will I learn? ***

Travel, Places, Directions..... There are so many words here! You will learn all the common used Danish words with fun and ease.

A quiz game was designed to make your learning more efficient.

***What won't I learn? ***

This app does not overload you with too many uncommon used words which you may not actually need.

Coping with stress and over-stimulation is therefore one reason that you won't keep learning.

Its clear focus makes the app a delight for you.

Factor Samurai – Multiplication and Division Mastery – Education / Math

By Third Rail, LLC

<http://www.thirdrailgames.com/support/>

<https://itunes.apple.com/is/app/factor-samurai-multiplication/id441919897?mt=8>

Winner Corona App of the Week!

Factor samurai is a great way to learn times tables. You play as the samurai whose sacred duty is to cut all the numbers down to their prime factors.

You will be thrown one number after the next, cut them up if they can be factored into smaller values, if not, if they are prime, do not cut them.

Prime numbers are numbers that cannot be divided into small whole numbers. Two, three, five, seven, eleven, and thirteen are all examples of prime numbers. Four is not prime because it can be broken down in the whole numbers two

times two.

Factor Samurai will reinforce the arithmetic principles of multiplication and division by continually challenging the player to remember which numbers can be factored into smaller values, and which ones can't.

As the player slices numbers into factors, those factors can be broken down further, until they are split into their prime factors.

Knowing that 63 is 3 times 3 times 7 or that 128 is 2 raised to the seventh power (7 twos!) is how you become a true Factor Samurai!

Factor Samurai is used extensively in the classroom. More than half of the recorded downloads are to public schools.

Free **Graphing Calculator** – Education / Math

By William Jockusch

<https://itunes.apple.com/en/app/free-graphing-calculator/id378009553?mt=8>

A powerful, flexible graphing calculator ... and it's free!

Does far more than most of the paid calculators out there ... let alone the free ones.

Features:

1) Scientific Calculator. Simple to grasp and easy to use, but powerful features are available when you need them. Available functions include the following:

- the usual arithmetic functions and exponentiation.
- square root, cube root, nth root, natural log, log base 10, log of arbitrary base, absolute value, factorial, permutations (nPr), combinations (nCr), modulus, random integer, bell curve, cumulative normal distribution, decimal to fraction.

2) Graphing. Capabilities:

- Graph up to four equations at once.
- Graphs are labeled.
- You can drag the graph or pinch to zoom in or out.
- Calculator can find roots and intersections.
- Graph in polar coordinates.

- Graph parametric equations

3) A unit converter. With a tap, you can enter the result of your conversion into the calculator. Currently converts different units of the following: acceleration, angle, area, density, distance, energy, force, mass, power, pressure, speed, temperature, time, and volume. Great for doing physics homework!

4) Constants for scientific calculations -- speed of light, strength of gravity at Earth's surface, etc. etc. etc. Tapping on a constant will insert it into your calculation -- i.e, you don't have to key in the value. Again, great for doing physics homework!

5) It can make a table of the values of any function you care to enter. You can choose the starting x value of the table, as well as how much x increases for each successive row.

6) Help screens linked directly to many of the available functions and constants. Tap the disclosure arrow to see the definition.

7) Forgot the quadratic formula? Or the double-angle formulas for sine and cosine? The math/science reference hits the high points of various subjects. Currently includes algebra, differential and integral calculus, geometry, trigonometry, vectors, vector calculus, and classical mechanics.

8) Keep track of significant figures [AKA sig figs]

9) Statistics -- enter data and make a histogram, box and whisker plot, or scatter plot with optional regression line.

If you are viewing this in iTunes, you will see five iPhone screenshots and five iPad screenshots. But even ten shots don't come close to showing everything this calculator can do.

I'd love to hear your comments or suggestions. You can write me at mathscxyzgraphcalc@gmail.com -- but without the xyz. Thanks!

★Featured in What's Hot ★

"Love the fact that it's such an easy app to use and to learn. It's a simple click process; select the frame, add the photos and then choose a border, how much

easier can it be? ...I am addicted to this app." - MonsterFreeApps.com

Picture Frames Free lets you get photographically creative. Combine multiple photos into beautiful frames then share with others. This app is really easy to use and doesn't cost you a thing.

You have those wonderful wedding and honeymoon pictures. There are so many great ones! You've been planning to send them to all your friends and relatives one at a time. Yawn. Boring!

Why not arrange those special snapshots into attractive groups that everyone will cherish? Maybe put the happy bride and groom at the top, a photo of that beautiful resort where you spent your first night as man and wife beneath it, with a shot of the two of you on the beach beside that. It's really easy, go ahead and try it.

Okay, that looks nice but let's jazz it up some more. Select a frame in the color you want, maybe one of your wedding party colors. How does that look? Mmm, not quite there, thicken the border a little. Yes, that's perfect! If you want, you can zoom in a bit to make sure people can see those newlywed smiles. Now, that is a great presentation of an important event in your life and it took hardly any time at all.

Picture Frames Free makes it super easy to combine multiple photos into frames to share your story with friends and family. There are tons of adjustable frames and a color palette to choose from, so there's something for everybody and every occasion.

Simply take photos or select existing ones from your camera roll. Arrange them the way you like, zoom, pan, make any adjustments then add any frame in your favorite color. Like we said, there is lots of variety, so get creative and put your personal touches to your photo groups. Make your borders thin, thick or in between, whatever spices up your pictures and makes them pop.

Your Picture Frames Free does all the work in a lower resolution, so you'll have faster processing and online uploading. When you print the finished images out though, you get high resolution for crisp clear memories.

When you've finished creating your framed pictures, show them off to others. The application lets you quickly and easily share them on Facebook, Twitter or our public user gallery. The whole world can admire your handiwork and if you want to, you can simply email your photos, like you'd planned to in the first place. However, now they will be extra special mementos of your big day.

Check out some of the features you get in Picture Frames Free:

- * Beautiful, intuitive interface
- * Very easy to use
- * Works with existing saved photos or new ones
- * Offers tons of adjustable frames

- * Varied color palette for your frame colors
- * Adjustable border thickness
- * Zoom, pan, and adjust your images

Depending on the data up to 10 different time frames between 45 days and 180 years can be calculated.

38 Days, 200 Days or 10 Years averages can be calculated, too.

GoldRatio lite shows up to 3 different ratio charts (15 in the full version).

The settings for each chart are stored permanently (Bookmarks).

The program is resolution independent and takes full advantage of iPad or retina screen resolutions. It works in portrait or landscape mode.

If you find this program useful, take a look at our app GoldRatio. There you can build and compare ratios out of yet 57 different values (commodities, currencies, indexes, stocks).

Hokusai Audio Editor – Music

By Wooji Juice Ltd

<http://www.wooji-juice.com/products/hokusai/>

<https://itunes.apple.com/en/app/hokusai-audio-editor/id432079746?mt=8>

"Beautiful clutter-free interface" — TouchProducer.com

"Hokusai will convince you that audio was meant to be edited with a touch screen — it's just so natural within this app that you'll find yourself consistently coming back to it." — iOS Music And You

Hokusai is a multitrack audio editor for iPhone or iPad. Record or import a track, and make it sound the way you want it to: not just trimming the ends, but full cut, copy, paste and delete, and a suite of filters and special effects available.

Edit many tracks side-by-side, mix them together, and export to wave or mp4 format — then transfer them to your computer via USB or Dropbox, or send them to another app on your device.

Hokusai is streamlined to give you a clean, clear view of your tracks. Use the familiar pinch and swipe gestures to zoom right in and fiddle with fine detail, or step back to see the big picture. And just like selecting text in other apps, you can select pieces of audio. Live "scrubbing" means you can hear the sound under your fingertip as you make your adjustments. And you needn't fear a bad edit with our full undo/redo support: as many levels as space allows.

Hokusai comes free with a set of useful tools such as fade in/out, normalise volume levels, reverse time, and basic synthesis. If you need more power, you can upgrade from inside the app to add new tools and effects, including: AudioCopy/AudioPaste, Time Bar (time line/ruler), per-track volume/mute dial, grain synthesis, noise gating, time-stretching, pitch-bending, echo, reverb, modulation (AM & FM), resonance, distortion, grunge, vocal levelling, monster voice, high/low/band-pass/notch-cut filter and more.

iBrainstorm – Productivity

By Universal Mind

<http://www.universalmind.com/>

<https://itunes.apple.com/us/app/ibrainstorm/id382252825?mt=8>

Capturing and sharing your inner most creative genius has never been easier. Introducing the first multi-device collaboration tool from Universal Mind. From iPhone to iPad with just a flick of the finger, iBrainstorm has set the bar and has redefined the very nature of collaboration.

Think it. Share it. Love it!

=====

Look for our other iBrainstorm app for the iPhone - iBrainstorm Companion! iBrainstorm Companion is used to connect to a running session of iBrainstorm on the iPad. It gives up to 4 people, the ability to create ideas on their iPhones and 'flick' them over to the iPad! It makes the brainstorming process engaging and fun. Give it a try!

=====

We created iBrainstorm as a pet project and it quickly elevated to an integral part of our normal User Experience Design (UX) process. It is now a part of our best practices in our methodology. We've decided to share this product with the UX community and hope that you'll find it as valuable as we do!

The design of this application was based around the way that we work at Universal Mind. We expect you to have other use cases and needs. Help us to make iBrainstorm better by giving it a strong rating and sharing your thoughts on improving it. We'll do our best to support your requests and questions in a timely manner.

=====

Usage Tips

=====

For the best connectivity between iBrainstorm and iBrainstorm Companion:

- use a wifi local connection

If there is no wifi connection available:

- turn off wifi on all devices
- turn on Bluetooth on all devices
- start the iPad session first, click on the connection icon - second from the right - and then launch your iPhone apps

If you are using iOS4:

- if you close your iPhone app while running a session, you'll have approximately 20-30 seconds to restart the app and maintain your session. If the session drops, force quit the app from your background processes and restart it. You'll need to press the connect button in iBrainstorm on your iPad.

<https://itunes.apple.com/us/app/jumbo-stopwatch/id474685619?mt=8>

Finally, a FREE stopwatch and timer for the iPad! This beautiful looking app not only functions as a stopwatch and countdown timer, it also runs in the background, so you can quit the app and come back to it later, without losing your time!

In addition, this stopwatch displays hundredths of seconds, so you can time events very accurately.

The stopwatch also has a 4 lap timer (after 4 laps, lap 1 is replaced by lap 2, etc.) so you can time lapped events!

You also get Jumbo numbers, so you can read the time from across the room!

The countdown timer even sends alerts to you if you're using another app at the time.

As an added bonus, Jumbo Stopwatch works on the iPhone, just in case you need it there too!

You can also choose to force the screen to stay on indefinitely, by touching the "Screen Turns Off" text, so the stopwatch or timer will stay visible at all times if you need it to. WARNING: forcing the screen to stay on indefinitely will drain the battery MUCH faster than letting the screen turn off!

All in all, this is a perfect, and much needed addition to your iPad's app collection!

LabTimer – Utilities

By OxOc

<http://0x0c.com/LabTimer.html>

<https://itunes.apple.com/us/app/labtimer/id292202454?mt=8>

LabTimer is a count-up and alarming count-down multi-timer.

NEWS

LabTimerPhD is now available. It has all the same functionality as LabTimer. If you like LabTimer, please consider picking up LabTimerPhD! I'll use the suggestions on LabTimerPhD for future changes. All updates will be applied to both applications.

NEWS

The look and feel of LabTimer is designed to emulate that of standard lab timers, providing quick access to count-down timers and repeat runs. LabTimer is not just good for the lab, though - it is also convenient for cooking, medication timing, working out, and child timeouts.

LabTimer has the following features:

- Four timers, individually configurable as count-up or alarming count-down
- Large display and buttons
- Display in Hours : Minutes : Seconds (limit above 1000 hours)
- Customizable text labels for each timer
- Small icons describing the state of all timers
- Disables iPod sleep, keeping your timer running and visible
- Designed to satisfy the lab needs of my molecular biologist wife

Count-down timers each:

- Display the projected finish time
- Alarm for one minute
- After the alarm, display the time elapsed since finish in red
- Repeat the last count-down by:
 - pressing clear while the timer is paused
 - pressing start/stop twice after the timer has finished

The iPhone currently prevents background processes, so LabTimer cannot alarm if the application is not running. However, the screen can be locked while the timers are running. The alarm also plays over and does not interrupt any playing music. While this will finally let you keep your noise-isolating headphones on during long incubations, please remember to experiment responsibly.

There are many timers and stopwatches on the App Store, but they did not fulfill my (or my wife's) needs. We're now using LabTimer, and we hope you will too.

LabTimer is free and will remain free. I've created LabTimerPhD, a pay app with identical features, if you'd like to contribute to future development. I haven't seen anyone else doing this and it seems like an interesting way of handling donations. :)

Please let me know what you think and how LabTimer can be improved, either via a review or the e-mail address on the website.

Thanks for looking!

Mancala – Deluxe HD – Games / Boardgames

By Fat Bird Games

<http://www.fatbirdgames.com/>

<https://itunes.apple.com/us/app/mancala-deluxe-hd/id459971718?mt=8>

Mancala, the centuries old game of collecting gemstones, is one of the world's oldest board games.

It is sometimes called "sowing" games, or "count-and-capture" games, which describes the game-play. Mancala games play a role in many African and some Asian societies comparable to that of chess in the West, or the game of Go in Eastern Asia.

Features:

1. Three levels of play, meeting needs of all players.
2. Play against a nearby player via Bluetooth or your friend on the same device with Two Players mode.
3. Enable to save game progress and load it next time.
4. Free to choose seed number(3-6).
5. Great visual effect and exciting sound effects.
6. Retina display high resolution.

Rules:

Except for sowing games, count and capture, this old board game also has many other names, such as kalah, oware, endodoi, awale and wari.

In this game, players begin by placing a certain number of seeds in each of the pits on the game board. Players take turns to sow. In the process of sowing, all the seeds from a hole are dropped one-by-one into subsequent holes in a motion wrapping around the board. When one player no longer has any seed in his holes, the game ends. The player with the most seeds in designated hole wins the game.

Fatbird is greatly honoured to bring you Mancala – Deluxe HD and will continue to add new features, please don't hesitate to rate us, we love to see your support and suggestion!

Fatbird also brings you other games: Ludo, Checkers, Tic Tac Toe, Gomoku, Dots, Othello, 4 in a Row, Chess, Backgammon

Math-Kaiser Lite – Education / Math

By tmx online GmbH

<https://itunes.apple.com/us/app/math-kaiser-lite/id386969470?mt=8>

★Math-Kaiser Lite is the free version of a game that can vastly enhance both your child's arithmetic skills and ability to focus. ★

16 different types of exercises from adding and subtracting to simple fractions, areas and money math allow you to get the basics solid before you move on to algebra, calculus & co. The game is aimed at children in elementary school, but you might be surprised to see how much your own brain can be improved..

All types of exercises can be combined, including:

- Basic Arithmetic (Add, Subtract)
- Counting dots
- Money math (2,60 - 1.80)
- Complete series of multiples (18 24 _ 36 42)
- Combinations like $(3 + 7 - 4)$ oder $(3 \times 6) + 9$
- Simple Fractions ("pizza slices")

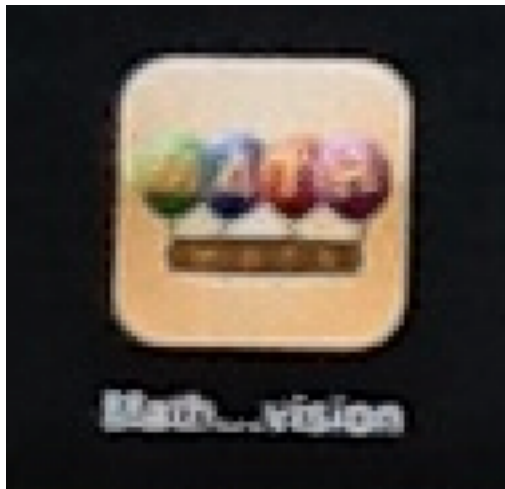

- The Area of Rectangles

You can train using Multiple-Choice or Classic Mode. The game idea of the latter is simple and intuitive: you are shown an exercise and an answer that might be correct or incorrect. Tap the answer if you think it's correct or strike through, if you believe it's wrong. Time is limited and each mistake you make shortens your life span... With only a few minutes a day your computing power and ability to focus can be vastly enhanced.

The full version of Math-Kaiser features more than 20 additional types of exercises:

- Multiplication
- Division
- Telling the Time
- Perimeter of Rectangles
- Prime Numbers

How to Make Origami – Education / Arts

By Sergey Burlakov

<http://howset.com/>

<https://itunes.apple.com/us/app/how-to-make-origami/id472936700?mt=8>

"OK, so everyone can fold paper in half. What's so exciting about that?" you may say. But you'll soon think differently when you learn more about the art of

origami.

Remember making paper airplanes at school? And remember how someone, instead of an airplane, made a flower, a jumping frog, or a parrot? That was like magic. And they only had their two hands and a plain piece of paper. How did they do it? We'll show you how.

The "How to Make Origami" app is simple and easy to use. Follow the step-by-step instructions and watch the 3D animation carefully. And don't worry, you'd have to try really hard to get confused.

"Hey, that point shouldn't be sticking out like that!" Something went wrong? That's because even an airplane requires concentration and patience. Let this tranquil pastime completely absorb you, and your complete relaxation is guaranteed. You know, those wise Japanese invented a great thing.

By the way, origami develops logical reasoning, attention span, spatial thinking and fine motor skills. Consider that when you're trying to keep fidgety kids busy.

Download for free over 70 traditional origami patterns for our app.

The most famous are

- Crane
- Dinosaur
- Flower
- Duck
- Rose
- Lily
- Jumping frog
- Pigeon
- Rabbit

Fold quietly, or your boss may notice!

Misunderstandings about pdf-notes:

Prisoner's Dilemma – Games / Psychological

By 82 Inc.

<http://projects.82apps.com/>

<https://itunes.apple.com/us/app/prisoners-dilemma/id400463376?mt=8>

****REQUIRES GAME CENTER****

Two suspects are arrested by the police. They are separated and given the option to turn in evidence against each other. If they each maintain their silence, they will both get off with a lighter penalty. However, if one of them turns in evidence while the other stays silent, the defecting suspect will get off scot-free while the silent suspect gets the brunt of the punishment. If you were the prisoner, what would you do? How much do you trust your partner?

This is the model for Prisoner's Dilemma, a classic psychological game adapted for the iPhone. It allows you to play this fascinating game against random players from all over the world.

The rules are simple - two players take turns choosing to 'cooperate' or 'compete' with each other. If both players cooperate, they both earn points. However, if one player cooperates and the other competes, the competing player will earn a bigger reward and the cooperating player will earn zero. The catch is that if both players compete, then you both earn a very small number of points.

As each turn progresses, the layers get more complex. Do you trust your opponent? Are you worried they will retaliate? Should you retaliate for their actions or be more forgiving?

You can see that beneath the simple exterior lies a complex and intense psychological standoff.

The paradox is that it's in your best interest to compete at every turn. But if you take that strategy, your opponent is likely to take the same strategy and you'll both wind up with extremely low scores.

Remember that this is NOT a zero-sum game - both players can wind up with high scores, or both players can wind up with very low scores.

So the choice is up to you - how much should you cooperate and how much should you compete?

The game can be used as a model for human behavior in a huge variety of areas - economics, business, politics, social psychology, biological sciences, and on. Any situation where you need to balance short-term gain with long-term cooperation contains elements of the Prisoner's Dilemma.

Proportions are useful for converting values based on relationships (e.g. width/height, Fahrenheit/Celsius, weight/height, mph/meters, U.S. dollars/Euros, pixels/inches, etc.) and are frequently used in high school and college level courses.

Simple Physics – Edu Games / Physics

By Jundroo, LLC

<http://www.jundroo.com/project/SimplePhysics>

<https://itunes.apple.com/en/app/simplephysics/id408233979?mt=8>

Be sure to check out my new game, SimpleRockets, which is a game where you build rocket ships and blast off into space to explore the solar system, all while using realistic physics: <http://simplerockets.com>

SimplePhysics lets you design complex structures for everything from tree houses to ferris wheels and then simulates your design with a sophisticated physics engine.

A wise person once said: "An engineer is someone who can do for a dime what any fool can do for a dollar." In SimplePhysics, your design must not only be strong enough, it must be cheap enough to win. With the built-in Leaderboards, you can also compete with people all around the world to see who can create the most cost effective designs.

Create your design in seconds with the blueprints editor. If you make a mistake, simply tap the Undo button. Zoom in and out by pinching the screen and pan the view using a two finger drag.

While testing, you can see how the strain is distributed across your design. Areas that are under immense strain are colored bright red, while other areas are colored green. This allows you to find and fix problem areas in your design.

The finger test lets you use your finger to push and pull on your design. You can use this with pinpoint accuracy, or you can just smash your design to smithereens. The finger test has an explosive new twist. You can now create explosions by tapping the screen for ultimate annihilation.

The newly added Bomb Shack level includes a dummy with full support for ragdoll physics. Throw him around, blow him up, and smash him against your design.

The slow motion feature lets you slow things down so you can see how your design is failing, and it is also incredibly fun to watch explosions destroying your design in slow motion.

Features

- * Realistic physics simulation
- * Ragdoll physics
- * Slow motion mode
- * Stress display shows problem areas in your design
- * Wide variety of levels!
- * Finger Test - smash your design to pieces, or blow it up with realistic explosions!
- * Leaderboards
- * Save/Load designs
- * E-mail your blueprints to your friends
- * Universal support for the iPad

Remember building a solar system in high school? Cups and papier-mache balls are in the past, because Solar Walk is an interactive orrery that shows all planets and satellites of the solar system in their correct positions in real time.

This 3D solar system model lets you navigate between planets, see their positions on a specific date, explore how they move and why. You will see the entire Milky Way galaxy from a far and zoom in to study all the planets and satellites in close-up, learn their trajectories, inner structures, history of their exploration, and geography.

Every planet has extensive information: size, mass, orbital velocity, exploratory missions, thickness of structural layers, and composition of atmosphere.

"Can't-miss app." - Mashable

“Solar Walk serves up a visually impressive 3D model of our solar system. Set against a haunting, atmospheric soundscape, the app shows planets and satellites in their correct positions, and offers mini movies, facts and other related tidbits.” - TNW

“This jaw-dropping app provides a wholly interactive 3D model of our solar system, one that’s had me hooked for days. It’s the kind of thing you can imagine a science teacher using in the classroom of the future — except that we don’t have to wait.”

“Zoom from Mercury to Pluto (which makes the cut in this app), passing each planet’s moons along the way. Because Solar Walk knows what time it is, the planets are in proper orientation to the Sun: Earth is dark where it is currently night and gradually lightens to daytime on the other side.” - NY Times

PRAISE FOR SOUNDCLOUD

“SoundCloud is focused on building out a massive trove of content, weaving it all into the Web and making it easier to share. The “YouTube for audio” analogy looks increasingly apt, especially if its metrics continue to shoot skyward.” - ReadWrite

“SoundCloud is a sharing machine. Remember the early days of audio online — when you had to download the Real Player or Windows Media Player to listen? The days of downloading before listening are over.” - USA Today

“It's an evolution of audio's most vital self-service creation and discovery platform, music's best analogue to Twitter, YouTube, and Kindle Direct Publishing. It's not just finding or sharing songs or podcasts or spoken-word readings your friends may be listening to — it's finding and sharing the people who make those recordings, too.” - The Verge

Sticky Notes – Productivity

By Rongrong Lai

<http://ilrrong.wordpress.com/2012/03/03/sticky-notes/>

<https://itunes.apple.com/us/app/sticky-notes/id507448702?mt=8>

Sticky Notes was designed to be an easy-to-use assistant in taking notes. It includes features as follows:

- Simple drag to add the notes.
- Simple drag to move the notes.
- Double tap to edit the notes.
- Long press to show action menu: Edit, Copy, Color, Email, Delete.
- Ten notes boards, and you can modify the name of every board.
- Change background for every board.
- Save notes or board to photo albums.
- Send notes or board by mail.
- Export notes board.

Reviews:

The idea of having note boards is perfect. Love it!

- victoriousnow

I bought this app early and am not disappointed at all as I love the simplicity and UI. I use it for brainstorming and ideas mostly. Please add support for larger boards in which you can zoom, stylised text and a few arrow makers to top off this app and make it the most useful one on my iPad!

- AlejandroBujano

I've been looking through sticky note-type apps to put on my iPad dock so that I can use them like I do in real life. I think this app is very good, because it is very simple to use (not all kinds of features that you can't do with actual paper sticky notes), and there is more than one board to categorize notes. Here is my wish list

for future versions: I would like to be able to label the boards (rather than having "board 1, board 2," etc.), have a few more boards, as well as other backgrounds to choose from for the boards (like even just a "cork" background or the choice of adding a photo). I would like to be able to default to smaller sizes of notes, so that more can fit on a page, or larger sizes so that you can stack smaller ones on top of it. Further, It would be neat if notes could be grouped/ungrouped by highlighting them or tapping on the ones you want, so that they can be edited together or moved together for sorting and organizing. I would like to be able to change the color of the note AFTER it has been written, rather than only initially. Right now, you can't get to the color pallet when you are editing the note. I think it would be more intuitive if, after choosing a color of note, the keyboard would pop up ready to type, or typing would begin upon using the keyboard, rather than choosing the color note, and then tapping the note to begin the typing. It would also be great if there was a feature that one could choose to have the sticky notes be a certain color or random colors by default and have them appear with just a tap on the add button. Thanks so much! I will continue to use this app on my dock, rather than the other sticky note apps, because it fits my needs without all the extras of alarms, etc. I look forward to more updates. Just please don't make it too complicated with too many decisions to make for each note created. Thank, again!
- Stickies4Life!

We wish you like this app, and please give us feedback and suggestions to help us to improve it.

Storyboards – Productivity

By Tamajii Inc

<http://tamajii.com/storyboards/>

<https://itunes.apple.com/us/app/storyboards/id392533504?mt=8>

Creativity can't wait! Storyboards let's you create your movie's storyboard yourself. Without the need for any drawing ability.

Thanks to the hundreds of characters and props included in the app, you'll be able to quickly compose the shots of your next movie, through an intuitive and feature-rich touch interface.

The characters and props are located inside the Library. Tap anywhere in a drawing to open it, or tap the Library button on the right of the toolbar. Asian characters are coming soon.

The free version lets you create up to 2 storyboards of 10 drawings. You can buy the unlimited Premium version through an easy in-app purchase.

IMPORTANT: Make sure to backup your storyboards periodically or before updating the app.

For iOS 4.x and later only

--> Answers to some of the comments in the reviews:

If you have any problem, please do not hesitate to contact us.

- If you have a crash when starting the app or creating a new storyboard, remove the app and download it again. This problem seems due to an incomplete download or installation and is usually fixed by a clean delete + re-install. Storyboards is a rather large app and sometimes Apple's installation system has

quirks like that.

- If you have a crash using the app, then it's most likely due to a memory shortage. Try to close the other apps by double-tapping the home button and doing a long tap on the app icons. Zooming a lot on a large object also consumes a lot of memory. We have restricted the amount of zoom that you can do on objects (to the detriment of extreme close-ups) and are working on solutions to this problem.

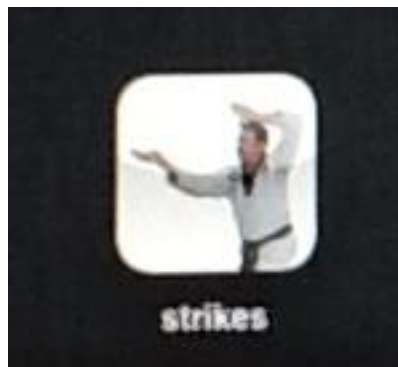

If you use the same AppStore account as the one you used to purchase the app initially, it will not charge you again. Backup your storyboards before doing this.

- You can move a drawing to another place in the sequence by doing a long tap on it and drop it wherever you want. The demo movie on Storyboards' page on our web site shows this.

- Arrows and frames can be added, on the Annotations layer, to indicate camera or character moves. Check the integrated Help for a diagram of supported gestures.

- The characters are accessed by gender. Then, through the Head selection, you can choose a different style or color. For example, select the Man, then either white, black, villain, etc.

Sudoku – Games / Boardgame

By Finger Arts

<https://itunes.apple.com/en/app/sudoku/id366247306?mt=8>

▷ Sudoku is Sudoku with Point System, Runs, and Online Leaderboards. Discover the next evolution of Sudoku with amazing graphics, animations, and ease of use. This is a Sudoku like one you have never experienced before ;)

...Thousands of puzzles, all free. Top class puzzles with selectable level of difficulty :)

To the classic Sudoku, we added:

=> A smart point system, wherein your score is based on 1) the value of each number multiplied (at the time of its match) by a multiplier that decreases in time and 2) the value of each block, row, column multiplied (at the time of its completion) by the decreasing multiplier

=> Thanks to Game Center, you can now rank and compare Sudoku scores and achievements against friends and strangers

=> ▷ Sudoku also counts the runs, that is, each uninterrupted sequence of games won, and adds them to the online leaderboards

In ▷ Sudoku, you win a game when you solve a puzzle with 3 errors or less (we used this threshold to give a bit of slack for mis-tapping :) Also, you have a number of hints to help you play (more at the easy, less at the hard level). To fit any taste, you can choose between a lush tile look or a more classic board look :)

You gain access to medium level after you win the easy level 2 times consecutively, same for hard level (3 times)

What our testers are saying:

- "The game is perfect! I am really loving > Sudoku. It is very addicting and fun, absolutely the best sudoku I have ever played."
- "Fabulous! You turned me into a > Sudoku fan hook, line and sinker :)"

Are you prepared? For The Top 10 Unarmed and Weapon Attacks You Will Encounter On The street...

Discover techniques that work where there are no rules and your attackers never play fair – on the real streets...

Too many variables occur on the street that don't exist in the ring. Eg. Weapons, ambushes, your surroundings, the time of day etc. Learn how to act quickly and

effectively in every situation.

This Military grade jiu jitsu system is created to work in real life situations, unlike MMA, UFC, Mixed Martial Arts, which is entertaining to watch but will get you killed in a street fight.

“While the general public was taught basic self defense and sport style Brazilian Jiu-jitsu, certain elite police and military personnel were taught a “military grade” version of the system. Little known outside of the few academies that specialized in it, “Military Grade” BJJ is truly the most complete and effective system of self defense known to man.

This lethal street version of Brazilian jiu-jitsu is hybridized with Combat (the once closely guarded Russian military hand to hand system of the old Soviet union) This system is used by Robert LeRuyet personally in real life self-defense encounters and is used to train his students who include soldiers of the Afghan war and the Canadian version of the Navy Seals.”

<https://itunes.apple.com/ca/app/inreverse-party-game-backwards/id409009761?mt=8>

THE FIRST TRULY UNIQUE PARTY GAME!

Bring your iPhone or iPad to the party or organize a party wherever you are in an instant. Play for a few minutes or for hours, it's up to you! The game is based on a popular Russian TV show. Watch our lame demo video at <http://inreverse.me> or read the reviews if you don't believe this can be funny!

HOW TO PLAY

1. Every game round involves two players, but if you have more people you can break into teams and change team every round.
2. The First Player secretly records a short fragment of a song a capella while the Second Player is not listening.
3. The Second Player listens to the recorded a cappella in reverse and tries to guess the song at once.
4. If the Second Player can't guess it, then he tries to repeat the reversed version by recording it fragment by fragment.
5. When all fragments are recorded, Second Player listens to them all together reversed back and makes his final guess! If he has repeated fragment close enough he should hear the original song. Or something very similar!

Check out <http://inreverse.me> to watch a demo video and to leave your feedback. Share your tips and game rules variations with everyone!

Dummy Defence – Edu Games / Action - Physics

By Jundroo, LLC

<http://jundroo.com/project/DummyDefense>

<https://itunes.apple.com/us/app/dummy-defense/id460832678?mt=8>

Be sure to check out my new game, SimpleRockets, which is a game where you build rocket ships and blast off into space to explore the solar system, all while using realistic physics: <http://simplerockets.com>

The spin-off of SimplePhysics. Protect your dummy from explosions, boulders, spiked walls, and more!

Use the blueprints editor to design a structure that will protect your dummy, Melvin, from some random danger. You'll have to work with the available materials. Most of the time you'll use wood, sometimes you'll use concrete, but you must always use your most important asset: your brain.

A wise person once said: "An engineer is someone who can do for a dime what any fool can do for a dollar." In Dummy Defense, your design must not only be strong enough, it must be cheap enough to win. Building cheaper structures will earn you more stars on a level.

Create your design in seconds with the blueprints editor. If you make a mistake, simply tap the Undo button. Zoom in and out by pinching the screen and pan the view using a two finger drag.

While testing, you can see how the strain is distributed across your design. Areas that are under immense strain are colored bright red, while other areas are colored green. This allows you to find and fix problem areas in your design.

The slow motion slider lets you slow things down so you can see how your design is failing, and it is also incredibly fun to watch explosions destroying your design in slow motion.

Features

- * Realistic physics simulation
- * Ragdoll physics
- * Slow motion slider
- * 25 levels
- * Stress display shows problem areas in your design
- * Finger Test - smash your design to pieces, or blow it up with realistic explosions!
- * Save/Load designs
- * E-mail your blueprints to your friends
- * Universal support for the iPad
- * Retina display support
